"It was incredible to be able to meet some of the movers and shakers in the New York tech scene. I'll be back."

- Ricky, NYC Turing Fellow, Foursquare, MS Candidate in Electrical Engineering

Select 2010 Startups, Sponsors and Partners

"I had other offers from big [tech] companies, investment banks and hedge funds... I am glad that I made the correct decision. If you like entrepreneurship and startups, you should definitely apply for the Turing program. There is no other summer intern program that can give you so much!"
- **2011 Turing Fellow**, SecondMarket

"I have done several internships in the past, but this was the first time a summer program really immersed me in a new culture. If you aren't interested in NYC startups now, you will be by the end of the program."
- **2011 Turing Fellow**, Pontiflex

"The percentage of women in the program was significantly higher than in my classes at college, which I really liked. I met several really smart, cool women programmers and it was refreshing not to feel like an outlier."
